

A detailed cross-sectional view of a cylindrical device 20. The device features a multi-layered wall structure. An outermost layer is labeled 28. Inside this is a layer with diagonal hatching, labeled 26. The core of the device consists of two main horizontal sections. The upper section contains a wavy, sawtooth-like structure labeled 22, which is supported by a base labeled 30. Below this is a layer labeled 32, which contains a series of small, repeating rectangular features labeled 23. The lower section contains a similar wavy structure labeled 35, supported by a base labeled 34. A central vertical channel or cavity is labeled 42. A dashed line labeled 'A' indicates a cross-sectional plane through the center of the device. Arrows labeled 28 point to the outermost layer on both the left and right sides.
